APPOINTMENTS AND LIVE QUEUES

Book a time. Or join the line before you arrive.

serveQ helps customers plan salon and clinic visits and gives venues one place to manage appointments and walk-ins.

YOUR LIVE QUEUE

3rd in line	18–25 min
Sample queue pass	Estimated wait

For customers, salons, and clinics

Plan your next visit

At participating venues, choose an appointment or join a live queue. See the service details and amount due before you confirm.

01 Find a venue

Explore nearby salons and clinics, compare services, and choose an available professional when the venue offers that option.

02 Choose how to visit

Select a date and time for an appointment, or review the estimated wait and join the live queue.

03 Check your visit status

Open your booking or queue pass to see the latest information. Queue position and wait estimates can change as the venue serves customers.

04 Pay at the venue

Settle the displayed amount at the counter. Find completed visits in your history and leave a review after your service.

Run your service day

Give customers a clearer way to plan their arrival and give your team a shared view of the work ahead.

01 Publish your services

Set your venue details, services, durations, prices, staff, and operating hours. Choose when to accept appointments and live queue entries.

02 Manage arrivals and service

Review the appointment list and live queue, assign a professional, start service, and call the next customer.

03 Record what happened

Complete the visit and record counter collection separately. Use visit history and customer feedback to review operations.

A practical pilot starts with one location

Choose a few services and a named person at the counter to run the first shift.

Try serveQ at your venue

Tell us where you operate and how you handle bookings and walk-ins today. We can discuss a pilot around the services your team already runs.

01 Share your venue details

Include your venue name, city or neighbourhood, service category, and a contact person.

02 Choose a pilot setup

Identify the services, operating hours, and staff who will manage the appointment list or queue.

03 Review the first shifts

Compare the number of completed visits, changes in wait estimates, and the feedback from customers and staff.
